DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the system of claims 11-12, 19 and 22 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The abstract of the disclosure is objected to because "is obtaining" should be "is obtained" and "accurate" should be "accurate". Correction is required. See MPEP § 608.01(b).

Claim Objections

3. Claim 2-9, 15-17, and 20 are objected to because of the following informalities: claim 2, "has" in line 3, should be "is". Claims 3, 9, 17, and 20, for consistency with claim 2, "isocenter" should be "magnetic isocenter." Claim 8 depends from canceled claim 1. Claim 15, "an" in line 3, should be "a." Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 5, 15-18, 20-22 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Regarding claims 5, 21 and 22, the specification fails to define "an optimal Field-of-View". Regarding claims 15-17, and 20 the specification fails to define "lower geometric distortion region," as well as "a higher geometric distortion region." Regarding claim 18, the specification fails to define "an accurate geometrical position of the FOV."

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 6-9, 11-12, 15-17, 19 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 6-8, "said fiducial markers" lacks antecedent basis. Claim 11, "at least one fiducial marker is applied to the body of the patient," it is unclear as to whether the "at least one fiducial marker" is part of the claimed invention, and if Applicant is attempting to claim "the body of the patient." Examiner suggests the use of "configured to be placed on the body" or "adapted to be placed on the body." Claim 15, "anatomical target" lacks antecedent basis, and fails to disclose merging the obtained first and second MR images, and is therefore incomplete. Claim 17, "said scanner" lacks antecedent basis. Claim 17 "at least one fiducial" is inconsistent with claim 15. Claim 21, the preamble is directed to "a method for planning radiotherapy treatment;" however, the body of the claim fails to disclose planning radiotherapy treatment.

Allowable Subject Matter

8. Claims 2-4 would be allowable if amended to overcome the objections set forth in this Office action.
9. Claims 6-9, 11-12, and 19 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Response to Arguments

Applicant's arguments with respect to claims 2-9,11,12,15-22 have been considered but are moot in view of the new ground(s) of rejection.
